=====

Stuart, Dave, Ron, Charles,

See email string below from Doug Ammon on HQ review of the West Lake SSFS work plans. We have four of them so far, attached below in case they have not already been provided to you. I anticipate two more and will forward them as they arrive from the PRP's contractor. I am also attaching EPA's letter to the PRPs requesting this work for the SSFS for your reference. Please advise when you believe you can complete your reviews and provide comments.

Sincerely,  
Daniel R. Gravatt, PG

Doug,

I was wondering if the HQ technical review team had been established so that Dan could send this information to them directly? My recollection is that Stuart Walker, Dave Bartenfelder, and Ron Wilhelm were going to be a part of that team. Let me know. Thanks!

Subject: West Lake Landfill: SSFS Partial Excavation Work Plan

Amy,

Here is the next workplan provided by the West Lake OUI PRPs for the additional evaluations requested by the NRRB. Since these additional evaluations are being conducted solely to respond to the Board's comments, it is essential that the Board review these work plans to ensure that the proposed work will adequately address the Board's comments, and to ensure that this is the final set of additional evaluations to be conducted prior to drafting the ROD amendment.

Please have the Board review and comment on this work plan and the others I previously forwarded to you, and I will pass the Board's comments on to the PRPs so they can make any necessary changes. While the Region may

provide its own comments to the PRPs on these work plans, the Region will not consider these work plans to be final until it receives the Board's comments (and the PRPs address those comments to the Board's satisfaction) or the Board informs the Region that the work plans are acceptable. As the PRPs provide the remaining work plans, I will forward them to you for the Board's review.

Sincerely,  
Daniel R. Gravatt, PG
